

Enunciat

1. Accedeix al següent [formulari](#) i contesta les preguntes que conté.

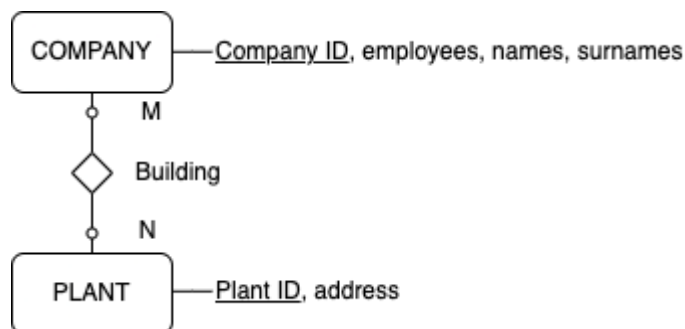

2. Design with ER model a database intended for managing the main needs of a company:

- a) A group (group-id) has several companies (comp-id), whereas a company belongs to one group.

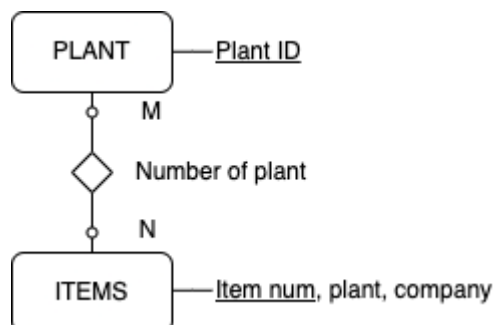

- b) Companies are connected by a hierarchical structure; each subsidiary is assigned to exactly one company of the next higher hierarchy level, the parent company.

- c) Each company has several plants (plant-id); a plant belongs to one company only.

- d) A plant produces many items (item-num). An item is only produced in one of the plants.

3. Fes un resum (esquema, mapa conceptual, diagrama) que contingui els elements principals del model entitat-relació.
